

Hemanth Kumar Bogadi

Backend Software Engineer | Python • FastAPI • Django • REST APIs • ELK Stack
Gudiwada, AP, India • +91 6383524796 • hemanthk.b@proton.me • [linkedin.com/in/hemanth-kumar-bogadi](https://www.linkedin.com/in/hemanth-kumar-bogadi)

PROFESSIONAL SUMMARY

Results-driven **Backend Software Engineer** with 3+ years of experience building scalable **RESTful APIs** and web applications using **Python**, **FastAPI**, and **Django**. Experienced in **Machine Learning**, **Deep Learning**, and **NLP** project development, with hands-on expertise in database optimization across **PostgreSQL**, **MySQL**, and **Cassandra**, and the **ELK Stack** for real-time log analytics. Also serves as a **Technical Trainer** for Skill Development programs at engineering colleges under the Government of Andhra Pradesh (Naipunyam initiative).

TECHNICAL SKILLS

Languages	Python (Expert), SQL, HTML, CSS
Frameworks	FastAPI, Django, Django REST Framework (DRF)
ML / AI	Scikit-learn, TensorFlow/Keras, NLTK, Pandas, NumPy, OpenCV
Databases	PostgreSQL, MySQL, Cassandra, Elasticsearch
ELK Stack	Elasticsearch, Logstash, Kibana
Concepts	REST API Design, Microservices, JWT/OAuth2, RBAC, CI/CD, Agile/Scrum

WORK EXPERIENCE

Freelance ML/AI & Full-Stack Developer

January 2025 – Present

Self-Employed | Remote

- Independently developed end-to-end **Machine Learning, Deep Learning, and NLP** projects for clients, spanning domains such as NLP sentiment analysis, disease outbreak prediction, fraud detection, intrusion detection, and stock market forecasting.
- Built production-ready **FastAPI + Jinja2** full-stack applications grounded in IEEE research, enhanced with ensemble ML methods (Random Forest, XGBoost, LSTM, CNN, SMOTE).
- Delivered complete web platforms including **Django eCommerce**, social media clones, and real-time analytics dashboards with WebSocket streaming and ELK Stack integration.
- Maintained Windows/Python 3.9 environment compatibility across all deliverables; resolved serialization, library version, and ORM conflicts iteratively.

Associate Software Engineer

February 2024 – December 2024

eTutorConnect | Vijayawada, Andhra Pradesh

- Architected scalable e-learning web applications using **FastAPI** and **Django**, supporting high-concurrency user loads with optimised performance.
- Designed and implemented **RESTful APIs** for seamless data exchange between front-end interfaces and Python backend microservices, reducing API response time through caching and serialization improvements.
- Optimised **PostgreSQL** and **MySQL** queries via indexing and ORM tuning, significantly improving database throughput under concurrent workloads.
- Integrated **JWT-based authentication** and role-based access control (RBAC) into API services, strengthening application security.
- Participated in Agile sprint cycles, code reviews, and unit testing to ensure reliable, production-ready releases.

Associate Software Engineer

March 2023 – January 2024

Eficens Systems | Hyderabad, Telangana

- Developed and maintained backend modules for enterprise web applications using **FastAPI** and **Django**, consistently meeting delivery timelines.
- Built a centralised log management pipeline with the **ELK Stack** (Elasticsearch, Logstash, Kibana), enabling real-time incident detection and reducing mean time to detect (MTTD) for production issues.
- Designed **RESTful APIs** for third-party integrations (payment gateways, notification services), improving system interoperability.
- Authored unit and integration tests using **pytest**, achieving 80%+ code coverage and reducing production regression bugs.

- Deployed services via **Docker** containers in collaboration with DevOps and QA teams, improving environment consistency across dev, staging, and production.

Technical Trainer – Skill Development

2026 (Ongoing)

Naipunyam Initiative, Govt. of Andhra Pradesh | Andhra Pradesh

- Delivered Python, Django, and Visualization tools training to undergraduate engineering students at **NRI Institute of Technology** and **Kuppam Engineering College** under the Government of Andhra Pradesh Naipunyam Skill Development programme.
- Designed curriculum covering full-stack development, ML fundamentals, and real-world project implementation, bridging academic learning with industry practices.

KEY PROJECTS

Security Analytics Dashboard

Python • Elasticsearch • Kibana • Logstash

Built a real-time security analytics platform ingesting enterprise log data through Logstash into Elasticsearch. Developed custom Kibana dashboards for anomaly detection, threat visualization, and audit reporting, enabling faster incident response.

High-Throughput API Gateway

Python • FastAPI • Redis • Docker

Developed a custom API gateway using FastAPI to centralise JWT/OAuth2 authentication, rate limiting, and request routing across internal microservices. Implemented Redis caching to reduce redundant backend calls and improve P95 latency under peak load.

FraudShield – Credit Card Fraud Detection

FastAPI • SMOTE • Random Forest • XGBoost

Five-classifier ML system with SMOTE oversampling and PCA, deployed with a responsive dark industrial UI featuring light/dark toggle and human-readable feature labels.

EDUCATION

B.Tech in Computer Science & Engineering

2018 – 2022

Ponnaiyah Ramajayam Institute of Science & Technology

CGPA: 7.8 / 10.0

Intermediate – MPC (Mathematics, Physics, Chemistry)

2014 – 2016

Narayana Academy, Kankipadu

CGPA: 8.1 / 10.0

ADDITIONAL INFORMATION

Languages: English (Professional), Telugu (Native), Hindi (Basic)

- **Open to:** Backend Engineer, Python Developer, ML Engineer, API Engineer, Software Engineer II
